TIAGO BEZERRA

AutoCAD/3D Max Designer

I have dedicated my entire professional career to working as a CAD and 3D Designer, a journey that began after graduating from Architecture School in Rio de Janeiro, Brazil, in 2005. Over the years, I have applied my expertise to a wide range of projects, including exterior and interior projects, trade show booths, and product designs.

Passionate about my craft, I am committed to delivering exceptional results for my clients. My process involves every step of a project: visiting sites for measurements, meeting with clients to gather ideas and references, sketching initial concepts by hand, creating photorealistic 3D renders for client approval, and producing detailed AutoCAD drawings for production. I often oversee the final on-site setup to ensure every detail aligns with the project vision.
